RESEARCH OVERVIEW:

Briefly describe your research. (200 words or less)

How is your chosen field relevant/important to Louisiana's coast and other coastal systems worldwide? (100 words or less)

How would you like to see your research program grow in the next five years? What coastal issue(s) are of interest to you? And how would you apply a multidisciplinary approach to problem solving? (200 words or less)

COMMUNICATIONS AND ENGAGEMENT:

Have you participated in other engagement trainings? If so, list.

How do you currently engage with communities about research? (100 words or less)

What science communication or community engagement skills do you hope to develop during this training? (50 words or less)

How would improved science communication or community engagement skills benefit your research? (50 words or less)

What part of your research is most challenging to communicate to non-scientists? (100 words or less)

What do you hope to get out of this experience? (100 words or less)
